Summary

Cloud Application Architect specializing in UI and API design, development, and integration. Experienced in building intuitive front-end interfaces and robust API-driven architectures that power scalable cloud solutions. Strong background in software development, cloud platforms, and Agile practices with proven success leading cross-functional teams. Skilled at collaborating with clients to deliver seamless user experiences, modernize application interfaces, and design API strategies that enhance system interoperability and performance. Seeking opportunities as a Cloud Architect or Developer to leverage expertise in creating user-centric, API-first, cloud-based applications.

Professional Designations

AWS Solutions Architect | AWS Devops Professional | AWS Security Specialty | AWS GenAI Developer Professional | AWS AI Practitioner | AWS Machine Learning Engineer | Kubernetes CKAD

Languages Frameworks

C# .NET	Angular	SQL	Typescript	NodeJs
JavaScript	Go	Rust	Docker	VueJs
Html		Python	React	

Cloud Providers Version Control Infrastructure Azure, AWS, DigitalOcean, Heroku Git, TFS, SVN Cloudformation, Terraform, Pulumi

Bilingual – Fluent in Spanish

Professional Experience

Travelers Insurance - Atlanta, GA

Sr Developer/Team Lead – March 2024 to Present

- Building Domain Apis using nodeJs and API Gateway.
- Prototype AI applications and AI augmented UI experiences.
- Contribute to the code base and documentation to ensure continuity and code quality.
- Participate in design and implementation conversations around deliverables for business stakeholders.

Cox Automotive - Atlanta, GA

Sr Developer/Team Lead – Jul 2023 to Mar 2024

- Building RESTful Apis using .net core and containers.
- Implementing Single Spa Micro front ends using React
- Lead team discussions regarding architecture and coding standards.

Amazon Web Services - Atlanta, GA

Cloud Application Architect – Aug 2021 to Jun 2023

- Responsible for end to end architecture and development during customer engagements.
- Participate in pre-sales meetings and design sessions to fit customer needs.
- Meet with customers and explain Aws offerings in depth as well as making tailor made recommendations for cloud migration/adoption.
- Assist customers during and after cloud migration with either lift and shift or entire rewrite of current on prem architecture.
- Build solutions leveraging several AWS services. Lambda, Api Gateway, S3, Step Functions, Dynamo Db, Aurora RDS, AWS VPC

Rent Ready- Charlotte, NC

Cloud / Dynamics 365 Developer – 2019 to Aug 2021

- Documented and developed azure functions/web apps/api's to extend the functionality of Dynamics 365 for the organization.
- Created and maintained Plug-Ins/Workflows and web resources that facilitate business processes within Dynamics 365.
- Implemented service bus queues that would manage messages being sent from dynamics and would then trigger several azure functions.
- Created CI/CD build and release pipelines for azure functions that would release to deployment slots based on environment and deployment triggers.
- Made design and architecture decisions and implementations in azure to better suit the company's needs. I.E. switched Apps from dedicated App Service to Consumption, converted existing Apps into azure durable functions, deployed static VueJs site to Azure blob storage, Created Non-interactive users within D365.
- Created micro-service applications that could act as end-points or interface with PowerApps and LogicApps.

nCourt - Kennesaw, GA

Mid Level Web Developer – 2018 to 2019

- Initiated a transition from TFS on prem version control to Git repos in Azure DevOps.
- Created and maintained front end applications using VueJs, While simultaneously building REST based web api's for said applications back end using .net core.
- Migrated existing stored procedures and database schema to Entity Framework Core using fluent Api.
- Created CI/CD build and release pipelines for legacy applications as well as for new development that could be used to release on prem or cloud.
- Converted existing local dlls/libraries into Nuget Packages hosted on Azure DevOps.
- Migrated legacy applications from VB.net to C# in .Net Standard while introducing current concepts.I.E. Unit Testing, Regression Testing, Abstraction, ORM data access.

Atlantic American Corporation – Atlanta, GA

Web Developer – 2015 to 2018

- Develop, design, and publish projects in staging and production environments for public clients and internal users with 100% on time project delivery.
- Create Web, Console, and REST API applications using .net Core2.0 and the .net core CLI. • Create Single Page Applications using the Angular CLI, Webpack and integrating Angular Projects into existing MVC 5 applications while maintaining existing continuous integration and deployment pipelines.
- Collaborate with CTO and marketing department in defining project parameters and design. • Write unit tests to verify expected outcomes. Identify bugs in existing code and implement enhancements to improve speed and functionality. Migrate legacy applications to current standards including .net 2.0.
- Assist with transition from SVN version management to a git based system in visual studio online that includes a CI/CD build and release pipeline.
- Maintain and create reports for business users using SSRS and SSIS packages.

Previous Work Experience

Rural Metro Ambulance – Atlanta, GA

Critical Care Paramedic – 2009 to 2015

- Accurately and efficiently diagnosed disease process to provide treatment in high stress settings.
- Participated in community education initiatives.

Merrill Lynch/Princeton Retirement Group - Atlanta, GA

Retirement Resource Representative – 2006 to 2009

- Asset retention specialist with over \$25 million retained in 2007.
- Co-Architect of a Spanish voice response system.
- Counseled Spanish and English speaking participants on fund options, withdrawal procedures, tax consequences and loan modeling for over 100 different 401(k) plans; educated them on plan rules

Education

Harvard Business School Online 2026

- AI For Leaders Certificate

ECornell 2024

- Technology Leadership Certificate

Medix Technical College

- EMT Paramedic Certificate

Miami Dade College 2002 - 2004

- Business Administration
